Assistanskompaniet · Full-time

Aug 2019 - Dec 2021

Stockholm, Sweden

RECEPTIONIST

Sonata Hotels Group · Full-time

May 2017 - Dec 2017

St Petersburg,Russia

To whom it may concern,

As an experienced JavaScript developer, I have dedicated several years to study at IT-Högskolan, where I have gained valuable proficiency in a wide range of skills and technologies. Throughout my academic journey, I have honed my expertise in HTML and CSS, Native JavaScript, UX/UI design, JavaScript with framework and open-source library such as Vue and React, Agile software development, backend programming, database management, cross-platform development, software life cycle management, and testing with TypeScript.

I excel in challenging environments and consistently seek opportunities to expand my skill set. As a quick learner, I am always enthusiastic about exploring new technologies and finding creative solutions to complex problems. My current tech stack revolves around TypeScript and React, with familiarity in modern technologies like React Query and React Hook Form. Moreover, I possess a strong foundation in Native JavaScript HTML and CSS, along with previous experience in backend technologies such as Node.JS, MongoDB, Sequelize and Express. By combining my frontend and backend expertise, I strive to deliver comprehensive projects, from conceptualization to completion.

During my recent internship at Stryda, I embraced significant responsibilities as an Intern in Back Office Development. I contributed to the creation of a robust back office for the BI team, leveraging technologies like React, React Query, TypeScript, and React Hook Form. This endeavor led to enhanced data management efficiency and remarkable improvements in operational effectiveness.

I possess good communication skills and can liaise effectively both with colleagues and, of course, clients. I am really enthusiastic about programming and exploring new things, and I am also a very social person, who like being with people from different cultures.

I am looking forward to discussing the job position and my qualifications with you in more detail soon. Thank you for your time and consideration.

Sincerely,

Ksenia Lukanina
